

CRYPTO ID™

SMART CREDENTIALS

CONTACT ONLY CREDENTIAL FOR SHORT TERM ACCESS TO LOW SECURITY AREAS

CRYPTO
ID™

DESCRIPTION

The CryptoID Contact Credential conforms to the ISO 7816 standard for contact smart cards and is interoperable in the BridgePoint EntryPoint and TrustPoint readers. The Credential is the ideal low-cost solution where there are short-term visitors and the customer is seeking a low-cost access solution. The Credentials support PIN Challenge and the PIN can be reset via the BridgePoint Card Manager Application.

FEATURES:

- Meets ISO-7816 Standard for Contact Smart Cards
- Low Cost
- Fast and reliable
- Supports PIN Challenge
- Operates in BridgePoint contact and dual-interface readers

*Contact or Contactless Redundancy
with PIN Authentication & PKI
Challenge Response

PIV-I "COMPATIBLE" DUAL INTERFACE CREDENTIAL WITH CAK CHALLENGE RESPONSE

CRYPTO
ID™

DESCRIPTION

The CryptoID PIV-Compatible Credential is fully interoperable with access systems based on the FIPS-201 Standard. The PIV-C credential is built per the guidelines set forth in the Personal Identity Verification for non-federal issuers of PIV Credentials. The PIV-C Credential contains all of the security objects on the Federal Issued PIV Credential except for the personal certificate, which requires a background check that confirms to the Federal Bridge Requirements.

Ideal for Government location desiring to be fully FIPS-201 compliant

FEATURES:

- Produced from FIPS-140 and 201 Credential Stock
- Supports PIN entry over the contact interface
- Dual Interface Contact and Contactless Operation
- Available in blank white for standard card printing.

*Contact or Contactless Redundancy
with PIN Authentication & PKI
Challenge Response
